

Wireless Hi Power Radio Modem

Model :RD232HI

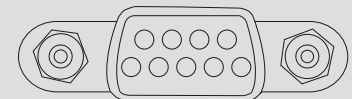

無線跳頻數據傳輸器系列產品款式眾多，多種功率及輸出界面，避免線材曝露於戶外遭受日曬雨淋，並節省昂貴的佈線成本，營造安全的無線環境。獨家採用跳頻技術，避免相近頻率之干擾。

This series of product comes in various selections including different types of output power and output interfaces. It is designed to withstand harsh environmental conditions such as the exposure of strong sun light as well as heavy raining. Wireless technology provides the benefit of cost-effective and safe solution instead of cable placement. The wireless hopping technology enhances the reliability of data transmission which reduces possible interference among closer frequencies.

- ▶ UHF Band Wireless Data Transceiver
- ▶ 432MHz~436MHz / 902MHz~928MHz
- ▶ RF Output Power: 500mW/2W/5W
- ▶ Distance:700m~2KM
- ▶ Sensitivity up to -129dBm(512bps) under
- ▶ Transceiver Data Rate 1.6Kbps~128Kbps
- ▶ RS232/RS485 Interface

RS-485

RS-232
